

The diagram is a geological cross-section showing two boreholes, labeled 1 and 2, with their respective soil profiles and construction areas. The vertical axis represents elevation in meters, ranging from +20 to +45. The horizontal axis represents the ground surface profile, which is a straight line sloping downwards from left to right.

**Borehole 1 (Left):**

- Starts at elevation +43.9.
- Soil layers from top to bottom:
  - kuivakuorisavi (dry crust clay)
  - pehmeä savi (soft clay)
  - sitkeä savi (sticky clay)
  - hiekkamoreeni (sand moraine)
- Ends at elevation +21.32.

**Borehole 2 (Right):**

- Starts at elevation +39.3.
- Soil layers from top to bottom:
  - kuivakuorisavi (dry crust clay)
  - pehmeä savi (soft clay)
  - sitkeä savi (sticky clay)
  - hiekkamoreeni (sand moraine)
- Ends at elevation +22.48.

**Construction Area (RAKENNUSALA):**

- Indicated by a horizontal line with diagonal hatching above the boreholes.
- Extends from the left borehole to the right borehole.

**Other Labels:**

- RAJA (Boundary) at the top left and right.
- AURAJOKI (Aurajoki) at the bottom right.
- W +34.74 (16.5.2023) at the bottom right.
- 0, 10, 20, 30, 40 kN/m<sup>2</sup> scale at the bottom right.
